## Free Reading Program PRO

The new **Free Reading Program PRO** was developed based on feedback from parents and teachers who love our program content but want a way to better manage its delivery and oversight.

It incorporates a Learning Management System (LMS) that offers the following features:

1. The ability to create multiple student accounts all at once through a bulk upload of a formatted txt or csv file.
2. The ability to create “groups” of students. E.g. associated with different abilities, grade levels, or interest levels.
3. The ability to assign activities and learning units to students individually or in a group(s).
4. Performance tracking and data analysis for comprehensive student assessment.
5. A group login option that removes the need for students to use their own email address.
6. The ability to add external “facilitators” associated with student accounts. Now a parent or grandparent (or other “facilitator”) can log in from anywhere to see how their student is doing.
